KRITIKA MAHARJAN

Stamford, CT | 203-550-8262 | kritika9775@gmail.com | linkedin.com/in/kritikamaharjan

Authorized to work in the U.S. - no sponsorship required | Open to remote and NYC/CT opportunities

PROFESSIONAL SUMMARY

Software Engineer with 4.5 years of experience supporting, enhancing, and modernizing enterprise applications using C#, VB.NET, .NET Framework, Web API, and SQL Server. Strong background in healthcare technology, including claims processing, capitation adjudication, EDI transactions, payment workflows, reporting, and production support. Experienced in troubleshooting application defects, optimizing SQL Server stored procedures, improving legacy systems, collaborating with business and QA teams, documenting technical changes, supporting deployments, and delivering reliable solutions for business-critical operations.

TECHNICAL SKILLS

Languages: C#, VB.NET, T-SQL, JavaScript, HTML, CSS

Frameworks & Libraries: .NET Framework, .NET Core, ASP.NET MVC, ASP.NET Web API, REST APIs, Blazor (basic exposure)

Data Access & Databases: ADO.NET, Dapper, Entity Framework, MS SQL Server, Stored Procedures, Views, Functions

Tools & Technologies: JSON, XML, Crystal Reports, Visual Studio, GitHub, Bitbucket, Jira, CI/CD, AWS

Methodologies & Strengths: Agile, Unit Testing, Code Reviews, HIPAA Compliance, Production Support, SQL Optimization, Data Validation, Query Optimization, Legacy Modernization, Application Refactoring, Technical Documentation, Remote Collaboration

PROFESSIONAL EXPERIENCE

Software Engineer | August 2021 - February 2025

Cedar Gate Technologies (U.S.-based) - Nepal

- Supported, enhanced, and maintained enterprise healthcare applications built with C#, VB.NET, .NET Framework, Web API, and SQL Server for business-critical claims, payment, adjudication, capitation, and reporting workflows.
- Designed and maintained SQL Server stored procedures, functions, views, and queries, optimizing performance, improving data integrity, and supporting healthcare processing, reporting, and operational needs.
- Built and maintained HIPAA-compliant EDI transaction processing systems (837, 835, 277) for claims intake, adjudication, downstream reporting, and third-party payment integrations using REST APIs and JSON/XML.
- Troubleshot and resolved production defects, SQL performance issues, data discrepancies, application errors, and workflow failures using SQL analysis, application logs, debugging, and root-cause analysis.
- Refactored legacy VB.NET codebase and enhanced .NET components to improve maintainability, reduce technical debt, preserve backward compatibility, and support incremental modernization efforts.
- Implemented efficient data access patterns using ADO.NET and parameterized queries, improving reliability, security, and database execution performance for high-volume operations.
- Developed responsive web interfaces and interactive components using HTML5, CSS, JavaScript, and Blazor exposure to improve usability across browser-based internal applications.
- Collaborated with operations, business analysts, QA, product stakeholders, and developers to analyze requirements, clarify objectives, translate business rules, support deployments, and document technical changes.
- Conducted code reviews and unit testing, resolved critical bugs before production deployment, contributed to release support, and mentored junior developers on clean code, design patterns, and .NET best practices.

Software Developer | August 2020 - July 2021

IMS Software - Kathmandu, Nepal

- Developed and maintained RESTful APIs, ASP.NET MVC applications, and backend services using C#, .NET, Web API, and SQL Server for business-critical applications.
- Designed and optimized MS SQL Server databases, queries, views, stored procedures, and data access layers using Dapper, Entity Framework, and ADO.NET for reliable high-volume data retrieval.
- Implemented coding standards, SOLID principles, clean architecture, and separation of concerns to improve maintainability, reduce defects, and support scalable application design.
- Built dynamic frontend features using AngularJS, JavaScript, HTML, and CSS, and collaborated with business stakeholders and cross-functional teams to gather requirements and deliver solutions on schedule.
- Participated in Agile ceremonies including sprint planning, stand-ups, and retrospectives to support iterative delivery and continuous improvement.
- Wrote unit tests, participated in peer code reviews, and used Git for version control to support code quality, debugging, and team collaboration.

EDUCATION

Bachelor of Computer Engineering | Graduation: 2018

Pokhara University
